

Roel Slootweg
Slootweg en van Schooten
Netherlands

I have browsed very quickly through the document; it is an impressive collection of relevant information. Nevertheless, from a biodiversity perspective the content is rather limited. What it says is OK, but there is much, much more to tell about biodiversity. And since biodiversity (including ecosystem services and human benefits) is one of the major issues in many new mining exploration and exploitation activities I think it merits more attention.
